**Digital Network**

## Digital Network

Astral Out-of-Home has introduced the first Digital Outdoor Network in Canada. Digital boards allow more flexibility and control over your advertising. With Digital you're ensured maximum exposure and effectiveness.

### Dynamic

Now you can display several messages on one site, adapt them according to time of day or a specific event. React faster, modify when you want and really take advantage of the digital revolution.

### Impressive

Exceptional in size, the Digital Network has the capacity to dominate. And with LED digital technology you're guaranteed the brightest colours and the best resolution ever.

### Visually Striking

The Digital Network has proven in research to capture the attention of motorists.
